

POWER PRESS CATALOGUE

Mechanical Power Presses · 3 to 500 Tons

India's Trusted Manufacturer of Power Press & Workshop Machinery

Range Overview

Our flagship product line. Mechanical power presses manufactured in-house with heavy-duty fabricated frames, balanced flywheels, precision-ground crankshafts, and hardened gears. Suitable for sheet-metal stamping, blanking, piercing, drawing, embossing, and forming.

Standard Tonnage Sizes

3, 5, 10, 20, 30, 50, 75, 100, 150, 200, 250, 500 Tons. Available in C-Frame (open back) and H-Frame (pillar) configurations.

Typical Specifications

- Stroke length: 25 – 250 mm (size-dependent)
- Strokes per minute: 30 – 120 SPM
- Ram adjustment: Manual screw type
- Motor: 1 HP – 50 HP, 3-phase
- Clutch: Friction / Pneumatic (model-dependent)
- Construction: Heavy-duty fabricated steel, stress-relieved

Applications

Sheet-metal stamping & blanking · Automotive component pressing · Hardware & utensil manufacturing · Electrical laminations · Forming, embossing, coining.
